

Product Overview

Nationwide ARMCO with Handrail is a high safety, security railing and is ideal for industrial estates, warehouses and car parks.

It has been popular for over 70 years starting production in the UK in 1954. It has been used on UK and European roadsides but also put to good use across a wide range of industries from logistics, industrial estates, agriculture and construction.

Due to their durability and strength they are very effective for protecting buildings, expensive machinery and livestock.
