

Product Overview

A Heavy Duty Water Filled traffic separator. At 2m wide & 1m tall the Bison water filled traffic barrier is a formidable barrier once filled with 400kg of water.

This newly designed 'water filled' Heavy Duty traffic separator is unique in the way it's been designed and can rotate a full 90 degrees enabling contractors to box off projects providing added security.

Weighing only 35kg when empty and 400kg when filled, the Bison Barrier is the No1 choice for cost effectiveness and effective site security and safety.

The Bison barrier can be connected together forming a complete barrier between the public and free flowing traffic.

Its unique design includes a Chapter 8 compliant hi-vis strip as standard and can be used in conjunction with a selection of different fence or hoarding panels.

Features
