

Product Overview

Nationwide In-Ground Timber hoarding system is our most popular In-Ground temporary hoarding systems. The system can be installed quickly, providing good site privacy and security. Visual graphics can also be fitted if required.

Timber Hoarding is commonly specified by local councils for demolition projects and provides a cost-effective solution.

Features

- **Solid Construction**
Security and safety for both workers and the general public.
- **Gates**
Temporary Vehicle and Pedestrian Gates are available up to 10m.
- **Colours**
Corporate colours and branding available.

Suitable For

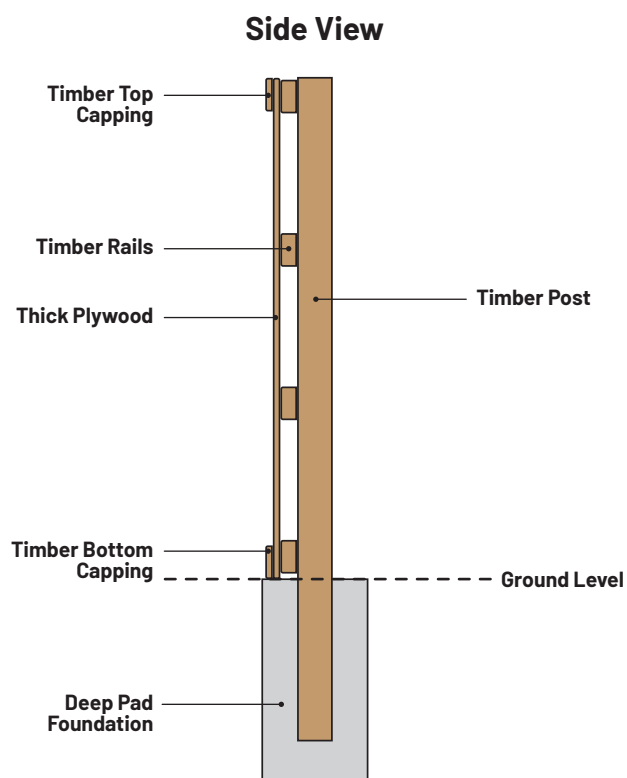

- **Car Parks**
- **Housing Developments**
