

Product Overview

Nationwide MUGA / Sports Fencing is designed in house with the client needs in mind. Constructed from Twin Wire 868 Mesh, this is the strongest form of sports fencing.

Our sports fencing has been installed in new school academies, parks and football training grounds.

Our fencing come as standard in green or black but can be powder coated in whichever colour you choose.

We also offer full or partial height full rebound mesh to enhance ball rebound performance. MUGA fencing can be integrated with additional polypropylene ball stop netting up to 10 metres high.

Nationwide can assist with creating and designing bespoke MUGA layout to suit your requirements.
