

Product Overview

Nationwide Multi Mesh is the perfect alternative to the classic Paladin fence system.

As with our profile mesh system, the characteristic 'v' profile design not only increases stability of the panel but also makes it more difficult to climb.

All our security mesh products are expertly manufactured using high quality pre-galvanised and zinc coated steel to prevent rusting, before receiving a factory polyester powder coating to your chosen RAL colour for a permanent security solution that is aesthetically pleasing and built to last.

Features

- **Multi Mesh System**
This is the perfect alternative to the classic Paladin Fence System.
- **Anti-Climb Features**
Multi Mesh is made from steel wires that make the panel incredibly difficult to cut or climb.
- **Aesthetically Pleasing**
Due to the construction of the panels, they are great security for boundaries and also pleasing to the eye, which is perfect for schools and workplaces.

Suitable For

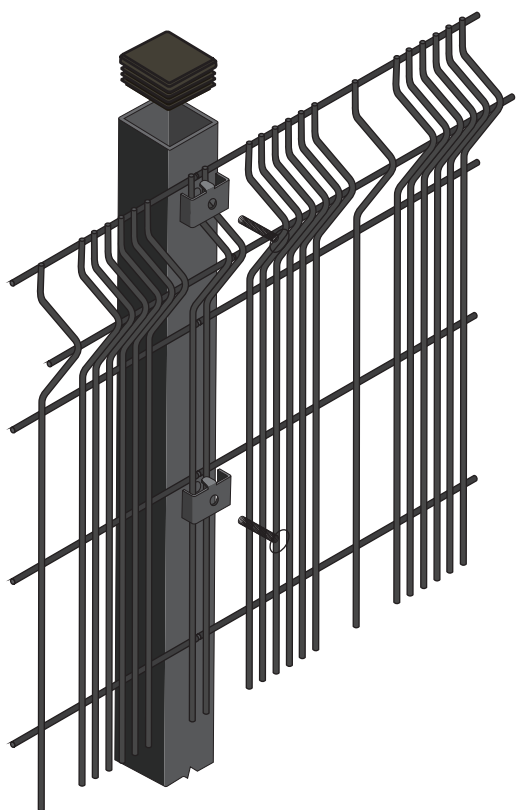

- **Factories**
- **Industrial Units**
- **Schools**
