

Product Overview

Our Rolled Top Mesh system is the ideal play safe fencing system for both school and playground applications with a welded wire mesh panel fence that has a rolled top and bottom edge for enhanced safety and rigidity.

Rolled Top Mesh will keep its shape and remain strong despite the daily impacts of children and sporting equipment.

Alternative uses include car parks, business parks and retail premises.

Features

- **Play Safe System**

With no sharp or raw edges, the Roll Top Mesh is the ideal system for schools and play areas.

- **Vandal Resistant**

Robust wire and welded joints make cutting very difficult using a conventional bolt or wire cutters.

- **Good Viewing Visibility**

The panels have excellent visibility characteristics, due to the flat two-dimensional profile the fence appears almost invisible. As well as pleasing on the eye, it offers great boundary or playground protection.

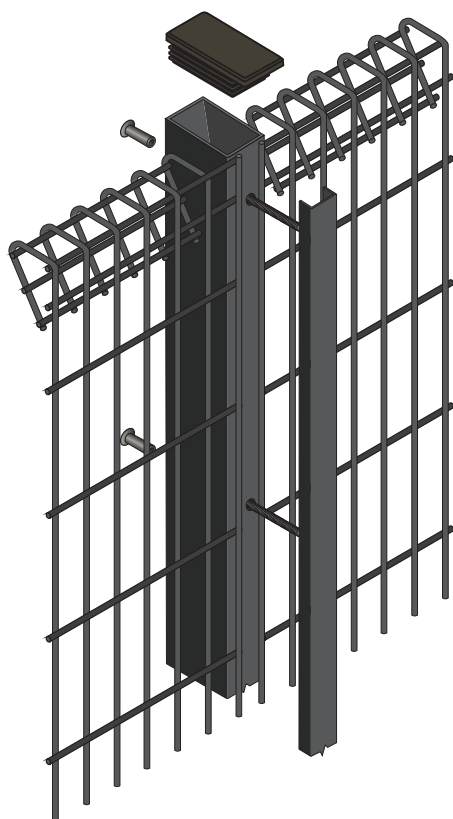

Technical Specification

Fence Height	Fixing Type	Post Centres	Post Size
900mm	C-Clip & M8 Bolt	3000mm	60x60mm
