

Street Furniture Options

Street furniture promotes public safety, social interaction, and improves overall urban livability, creating inviting and people-centric spaces within a busy urban area.

High quality street furniture that features:

- ✓ Armco Barriers
- ✓ Cycle Shelters
- ✓ Bollards
- ✓ Bin Stalls

ARMCO Barrier

ARMCO Barrier is a high safety, security railing and is ideal for industrial estates, warehouses and car parks. Due to their durability and strength they are very effective for protecting buildings, expensive machinery and livestock.

Available in heights of 560 - 760mm

ARMCO can be dug in ground or base plated, coated in any colour and are available with or without a handrail.

Cycle Shelter

Our cycle shelters are ideal for offices, schools, or public spaces looking to promote eco-friendly commuting and provide secure bicycle storage. The shelter is easy to assemble and comes with optional add-ons like secure locking systems and lighting for enhanced security featuring a sturdy steel frame and a weather-resistant roof.

Encourage cycling, reduce carbon footprints, and improve the overall well-being of your employees or visitors.

Key Clamp Rail

Nationwide Key Clamp is versatile railing system which connects cast iron fittings and tubes to form all types of handrail, railings and perimeter structures. It is the ideal solution for easy construction of all safety barriers.

Available in heights of 1200 - 1800mm

Key Clamp can be used in various environments, be adapted on site to comply with safety standards.

Bin Store

The Nationwide Aspen Bin Stall is one of our most popular Bin Stalls we provide due to the aesthetically pleasing design. It is constructed from a galvanised box section steel frame and finished in a tanalised timber board.

Available in heights of 1800 / 2000 / 2400mm

Nationwide Bin Stalls have been installed in schools, factories and residential housing developments.

Knee Rail

Nationwide's Timber Knee Rail system, also known as birdsmouth and diamond rail, is a popular, low cost, long term solution, ideal for demarcation or around car parking areas.

Available in heights of 450 - 900mm

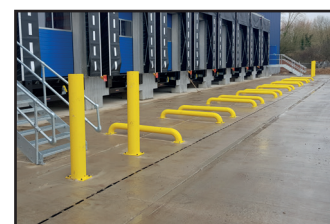

Nationwide Knee Rail is a popular option for schools, alongside footpaths, and at sports fields and play areas.

Wheel Stops

Wheel stops, also known as parking blocks or parking curbs, are essential traffic safety devices placed in parking lots or garages to prevent vehicles from overrunning designated parking spaces.

Available in all heights and lengths.

Wheel stops effectively protect structures, curbs, and pedestrians while assisting drivers in parking accurately.
