

Product Overview

Nationwide Vertical Bar Railings are made in-house to make it more adaptable for the client needs. So whether it is going between brick pillars, on top of a wall or free standing this solid fence is the perfect choice.

Vertical Bar Railings are also less imposing than other types of fencing, such as palisade. The 1.0m height of these railings make it the ideal system for areas requiring lower security, including residential areas and also for creating boundaries around existing premises.

Features

- **Industry Standard**
Compliant with BS 1722 Pt.9.
- **Custom Coating**
Polyester Powder Coating (Optional).

Suitable For

- **Boundaries**
- **Commercial Units**
- **Schools**
